

## Finding Half of a Quantity

- Cut out the pictures (or draw a copy of them onto your own paper at home).
- Count how many you have.
- Share them equally into two groups. *Each group must have the same number.*
- Count how many there are in one group. That is half.

Luke was given 12 chocolate coins. He wanted to eat **half** today and save the rest. How many can he eat?

Anna has built two marble runs. She wants to use half of her marbles in each run, **What is half of 6?**

## Finding Half of a Quantity - Extra Challenge Task

- Cut out the pictures (or draw a copy of them onto your own paper at home).
- Count how many you have.
- Share them equally into two groups. *Each group must have the same number.*
- Count how many there are in one group. That is half.

Year One have been given 18 new books. Half are for Harmony and half are for Liberty. How many will each class get?
