

Teaching point:

Numbers that have 0, 2, 4, 5, 6 or 8 in the ones column are **even** numbers.

Numbers that have 1, 3, 5, 7, 9 in the ones column are **odd** numbers.

Tens Ones

1 **5** *15 is an odd number.*

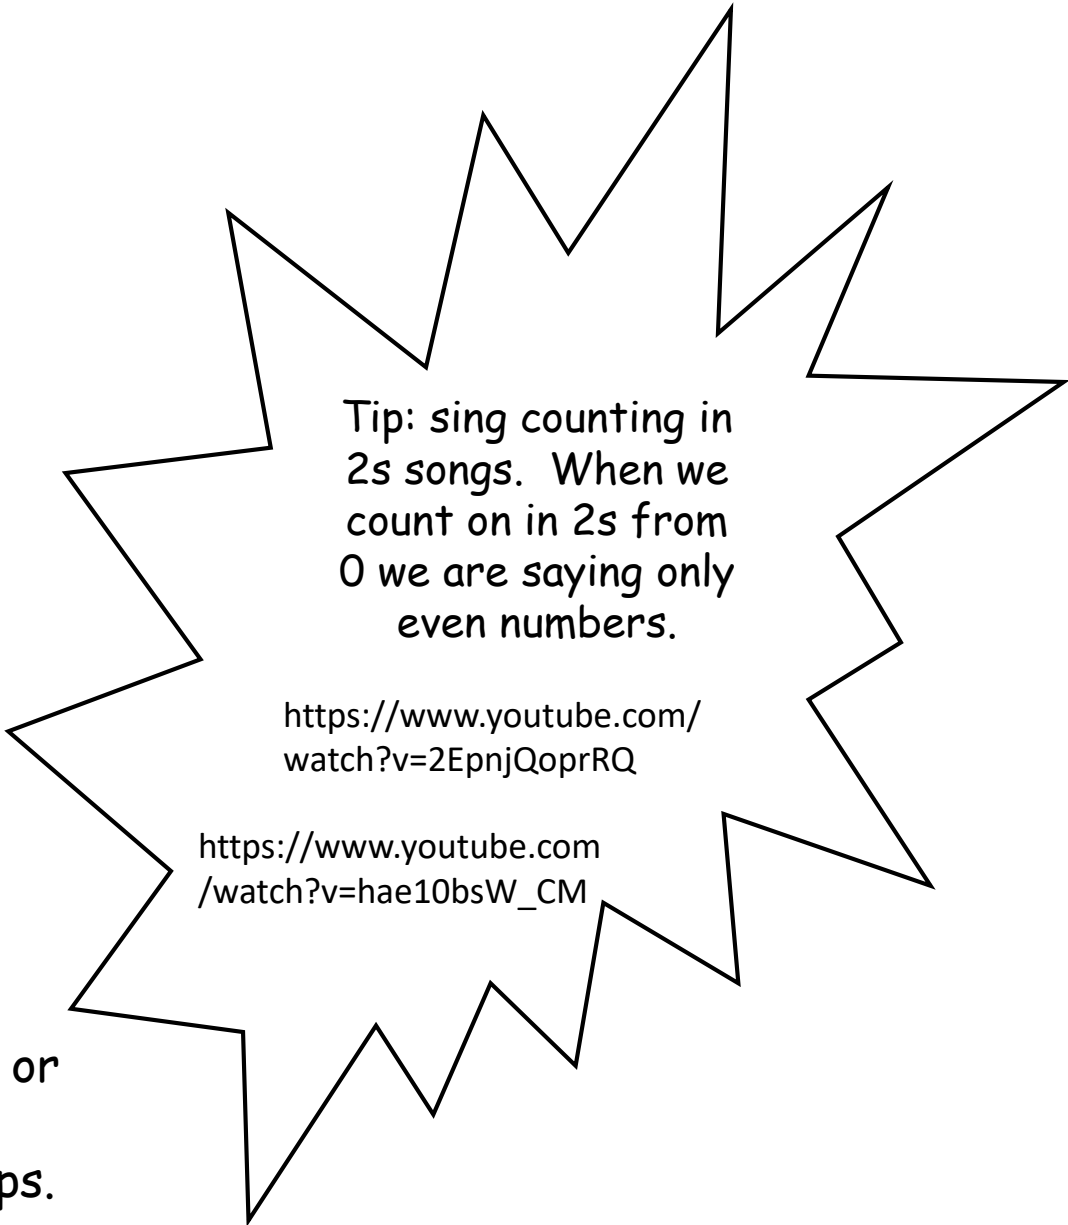

8 *8 is an even number.*

Task

Cut out the numbers from the previous page or write the numbers out on your own paper.

Choose 8 random numbers from 0-20 and put them into 'odd' or 'even' groups.

OR put all of the numbers from 0-20 into 'odd' or 'even' groups.

Tip: sing counting in 2s songs. When we count on in 2s from 0 we are saying only even numbers.
