48 ÷ 6		15 ÷ 3				2 X 4		15 ÷ 3					
24 ÷ 4											2 X 2		
START		9 ÷ 3					5 X 2		28 ÷ 4		3 X 3		

Teacher's notes

- Put your counter on start, roll the dice and move the correct number of spaces in any direction.
- If you land on a blank square, or an arrow, stop there.
- If you land on a question, answer the question. If you answer correctly you move the number of spaces in the same direction as you were heading e.g. if you answer $6+5=11$ you move 11 spaces in the direction that you were moving. If you hit a wall at the side, you bounce off back towards the direction from which you came.
- If you land on a question, answer it and keep going until you land on a blank or an arrow.
- Then the next player has a turn. They can move their dice roll in any direction.
- Any player who lands on an arrow has to move in that direction for their next turn.
- The winner is the first player to get exactly to the end square.
